

# That #&@^! Badge!

Kylie: Do you want to help with the badge?

Me: Okay what's the brief?

Kylie: I want WiFi.....

.

.

.

WHAT WAS I THINKING!!!

# Iggy :-)

- Electronics engineering
- Amateur “HAM” Radio
- Security & digital forensics (SANS junkie)
- Law enforcement & rescue
- ICT
- I like to make stuff!

# Badge concept

“A cool badge that does everything and costs nothing”

So lets have WiFi and a full colour TFT display and buttons and SD card and 16 GPIO lines and eight 12 bit A/D lines and and and...

# Design choices

- Common hardware
  - ESP8266 WiFi processor - NodeMCU
  - ST7735 SPI 1.8" TFT
- Common software
  - Arduino IDE
- Make it accessible to hobbyist & hackers

# P of C

- SparkFun ESP8266 "thing", then
- NodeMCU from TronixLabs
- Displays from eBay

# Squeeze the \$\$\$

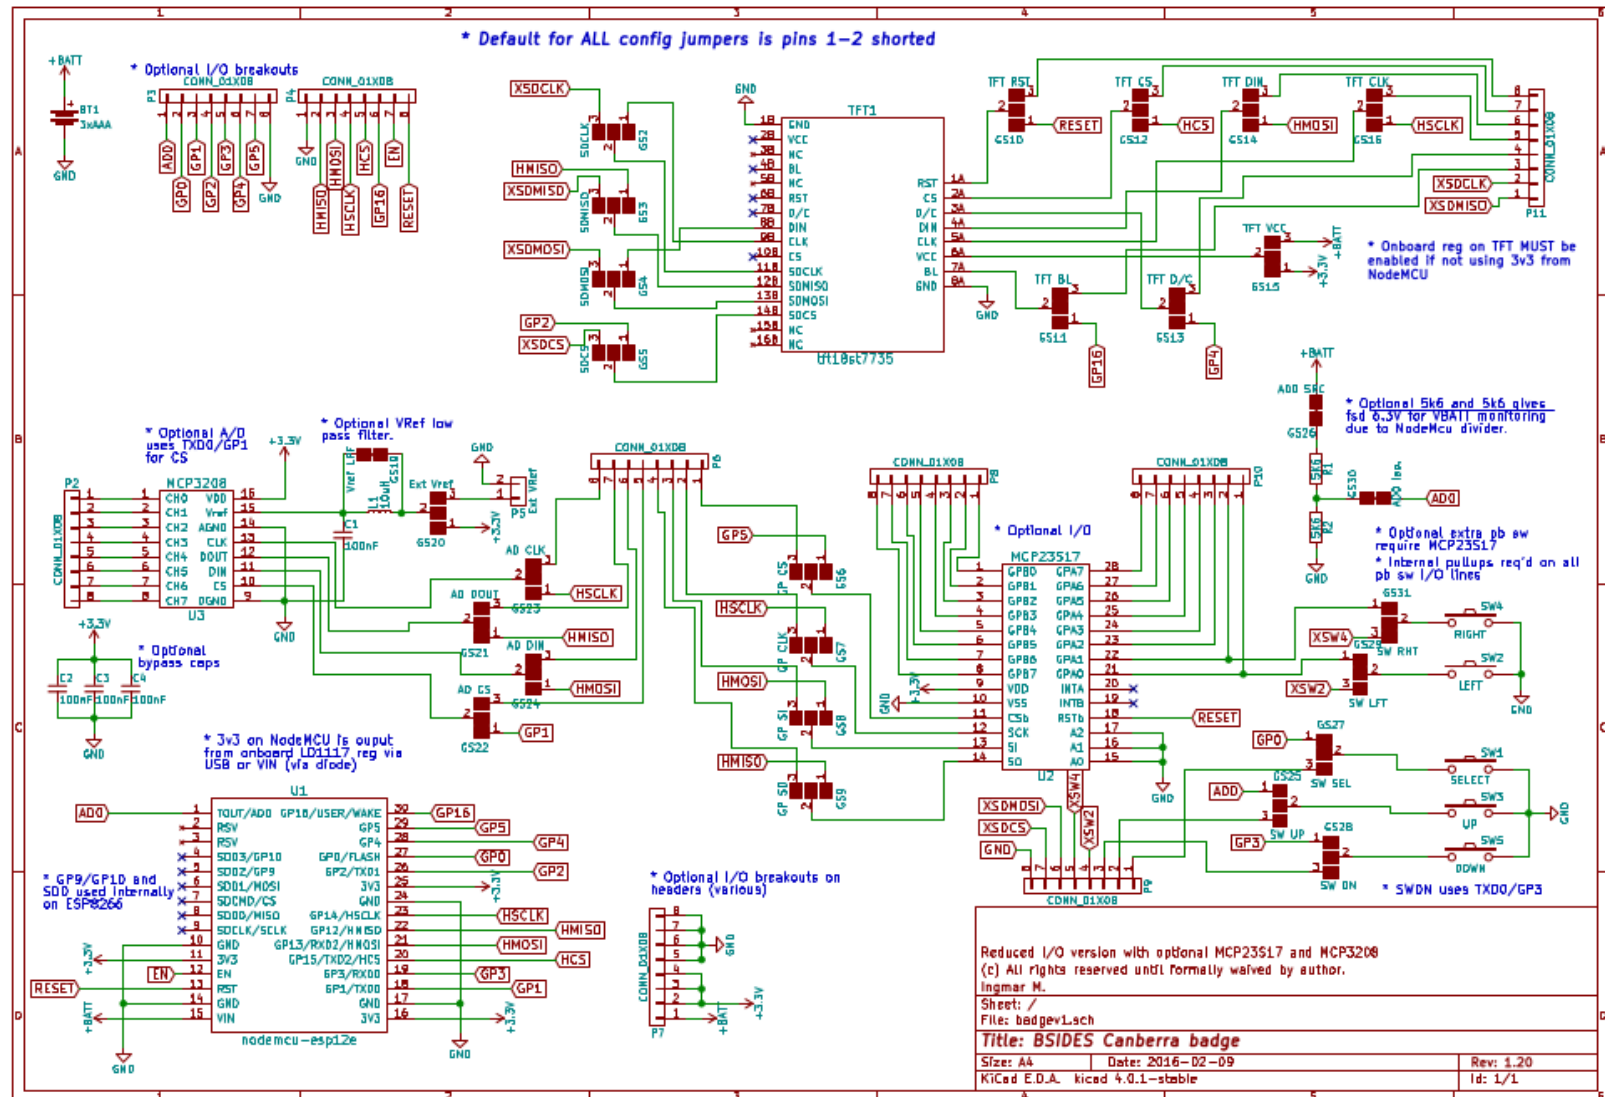

- “In the box”
  - NodeMCU Wifi, 1M code space
  - TFT & SD card I/O
  - Basic buttons
  - A/D on battery line
- Upgrades
  - Full button pad (5 buttons)
  - 16 GPIO with MCP23S17
  - 8 x 12 bit analogue inputs with MCP3208

# Hackable!

- EVERY I/O can be customised
  - Option jumpers
  - Everything on headers

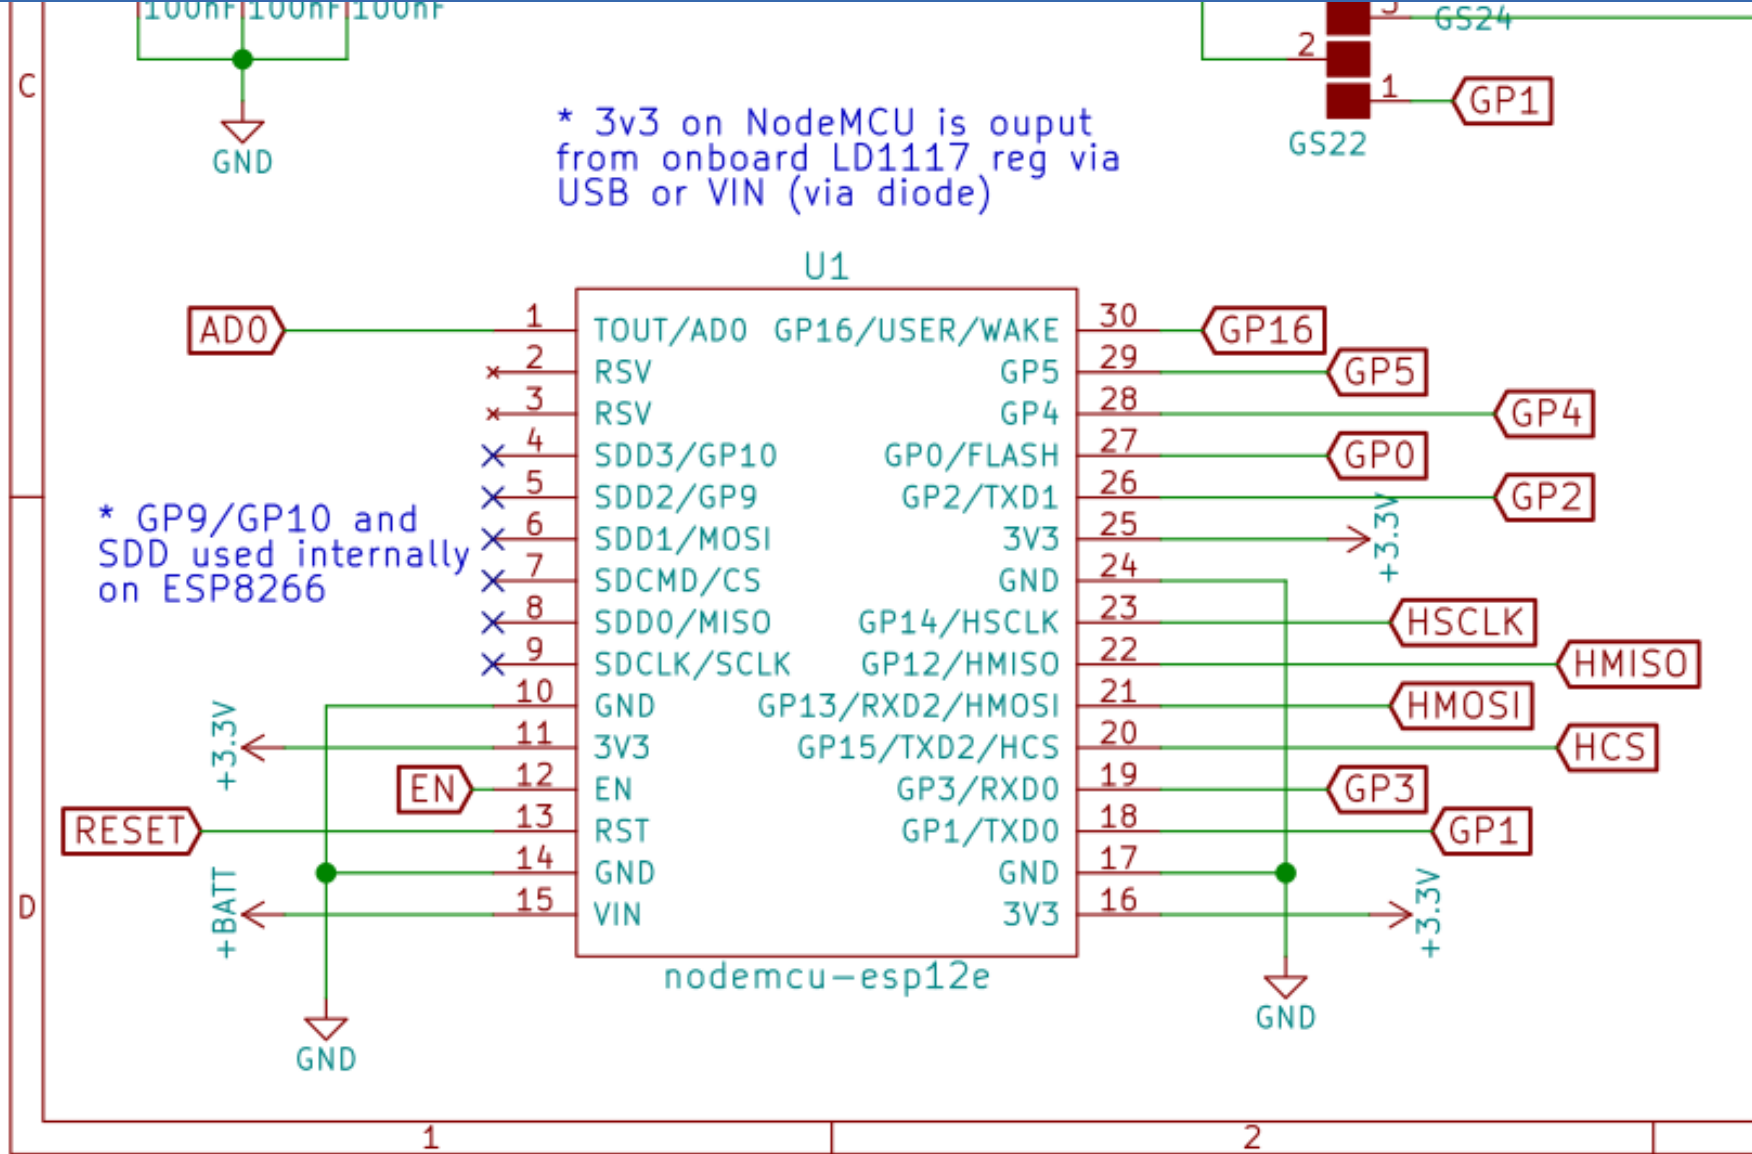

# Overview

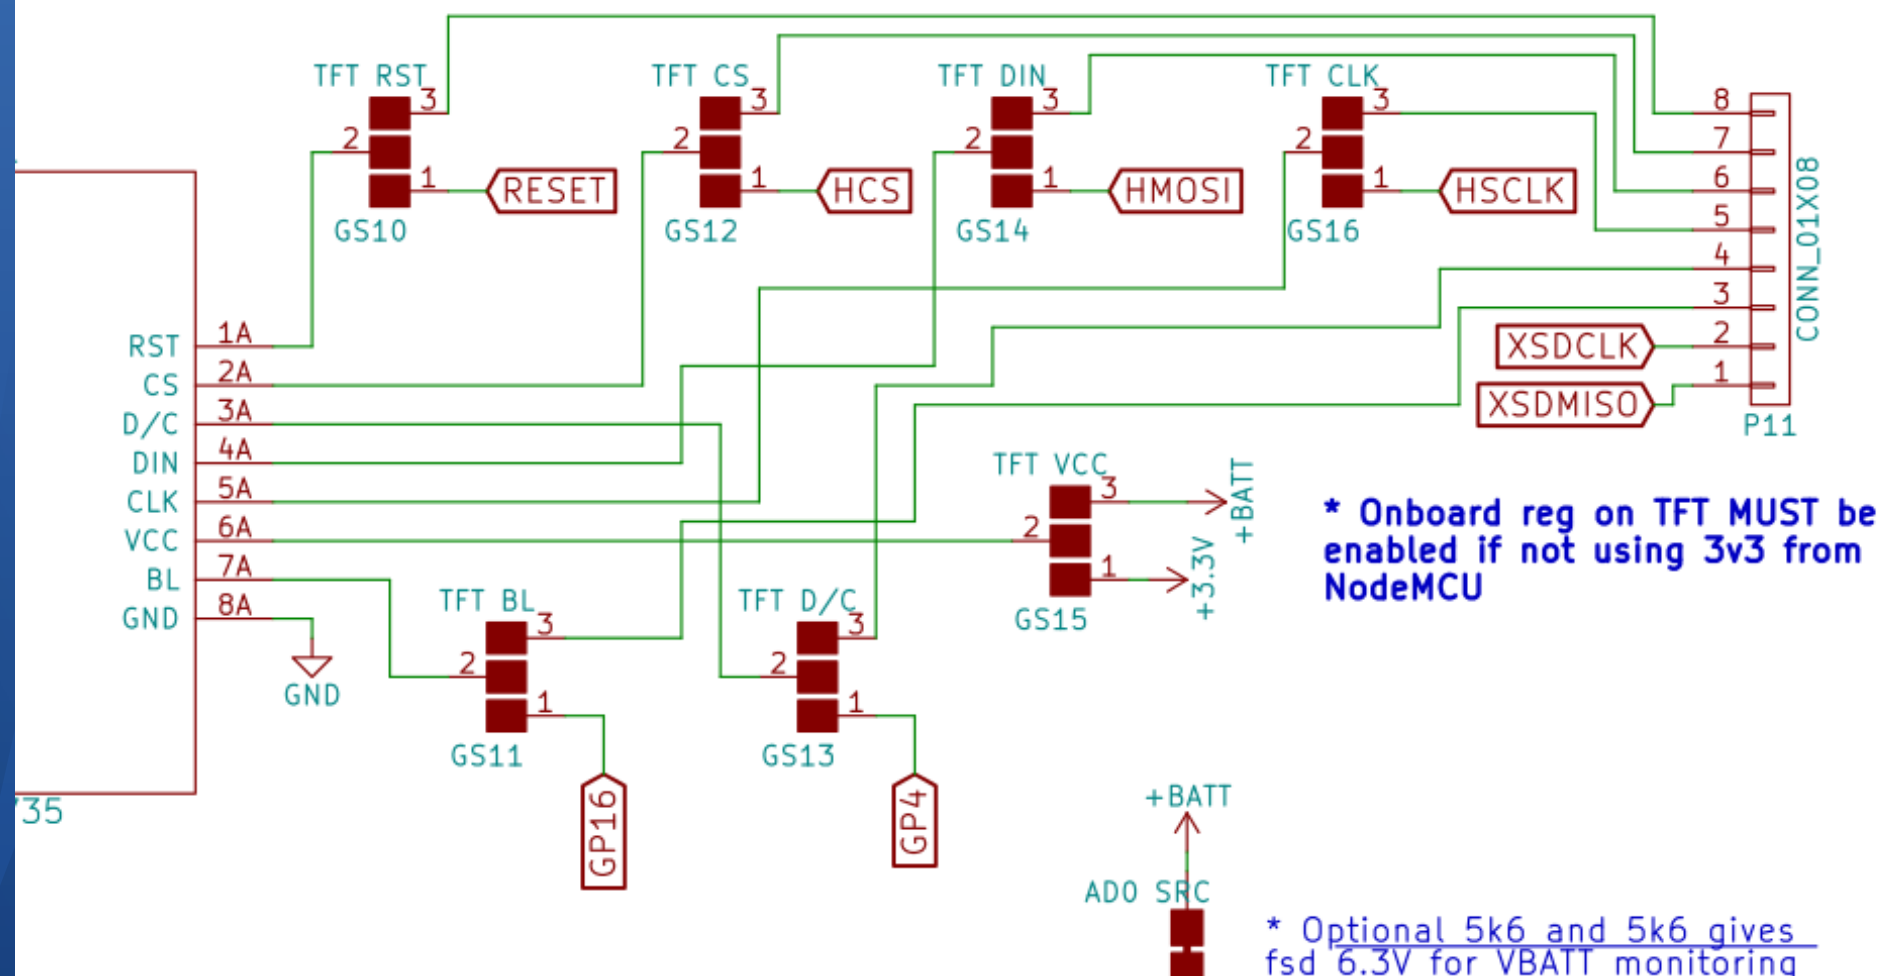

# NodeMCU

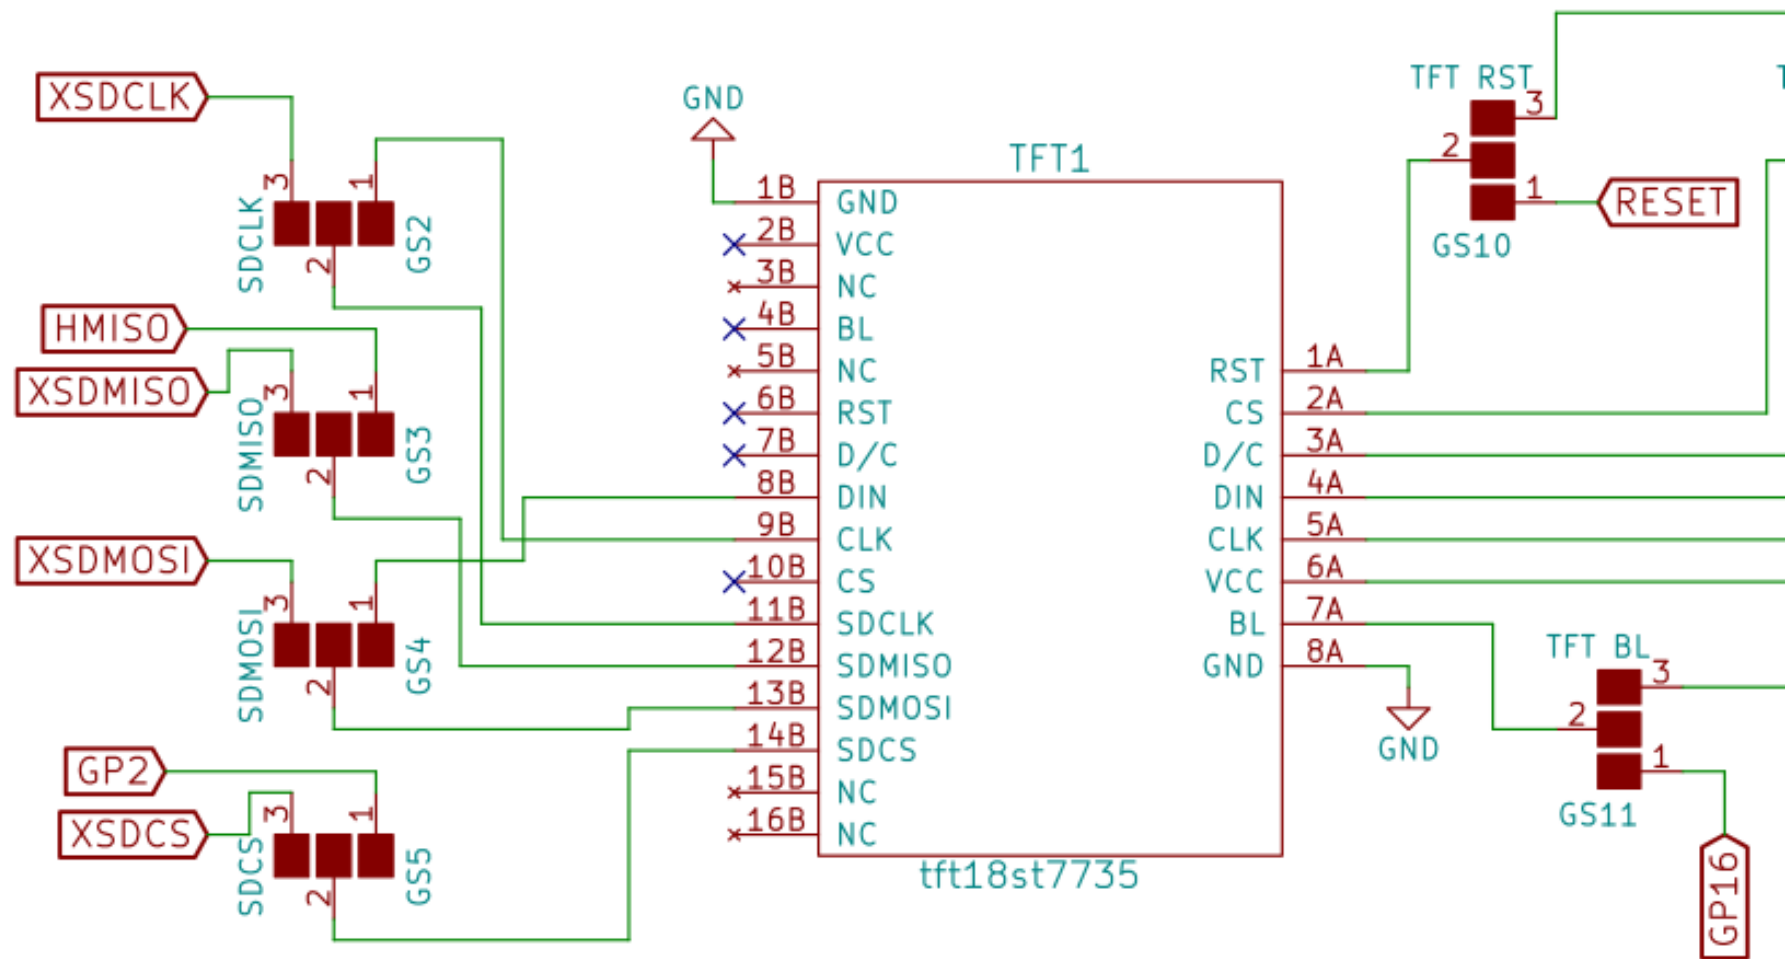

TFT

shorted

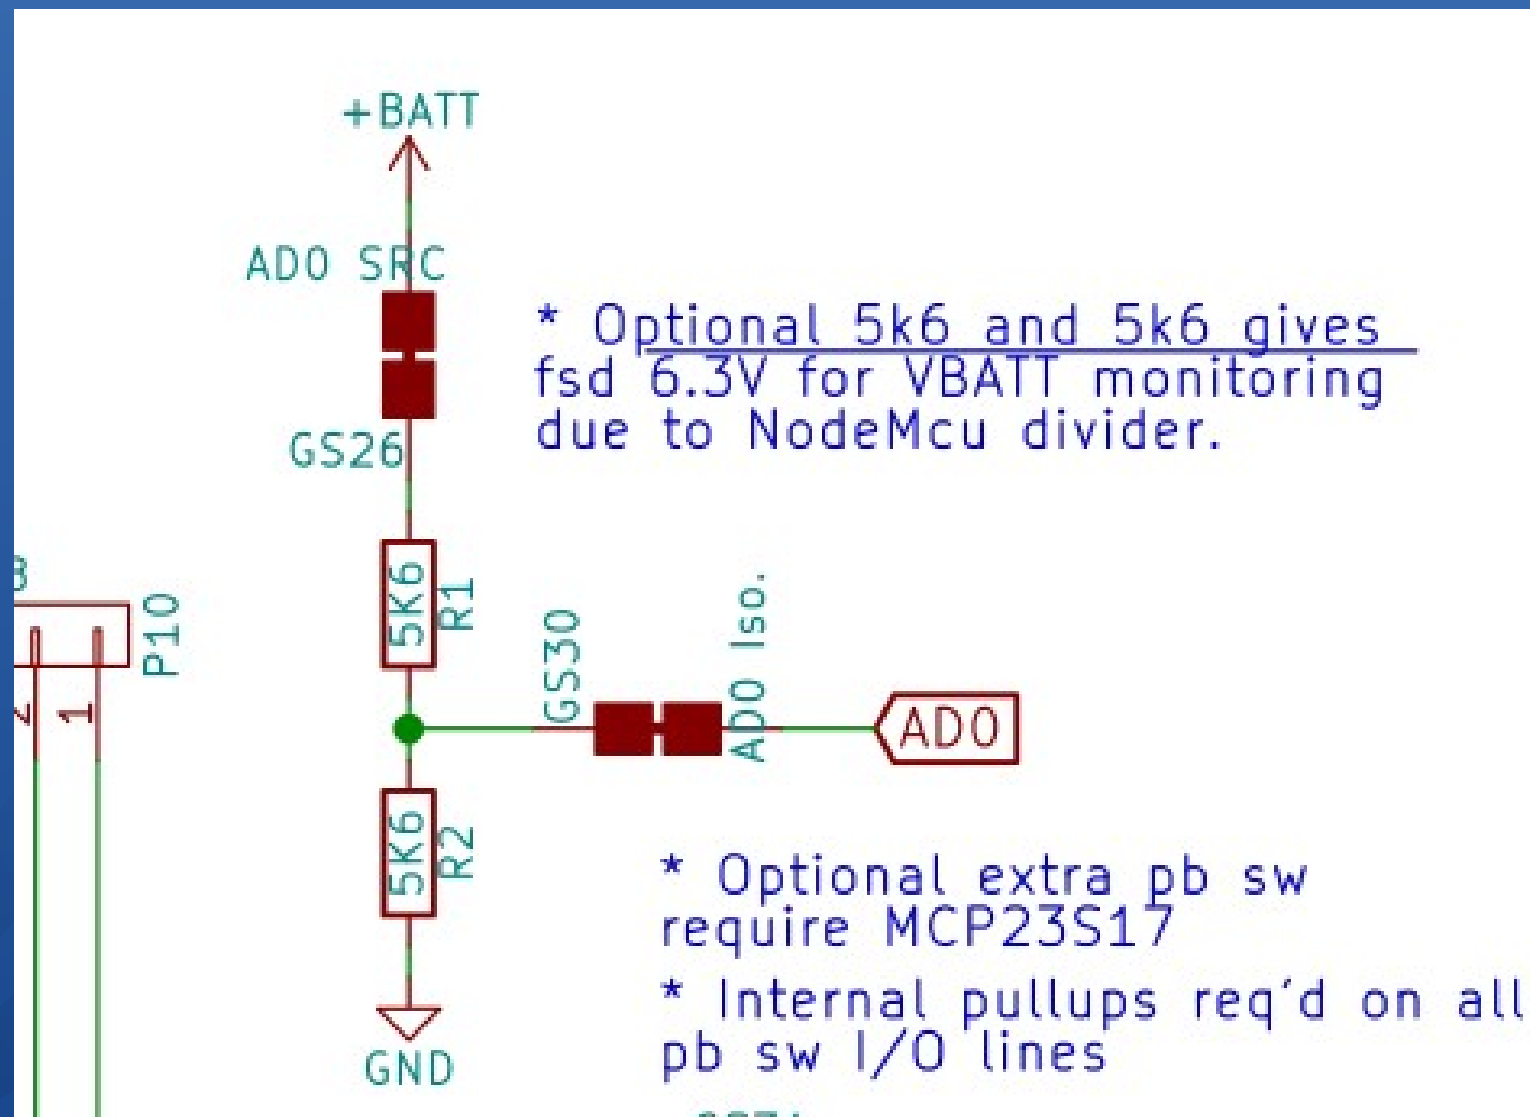

# SD Card

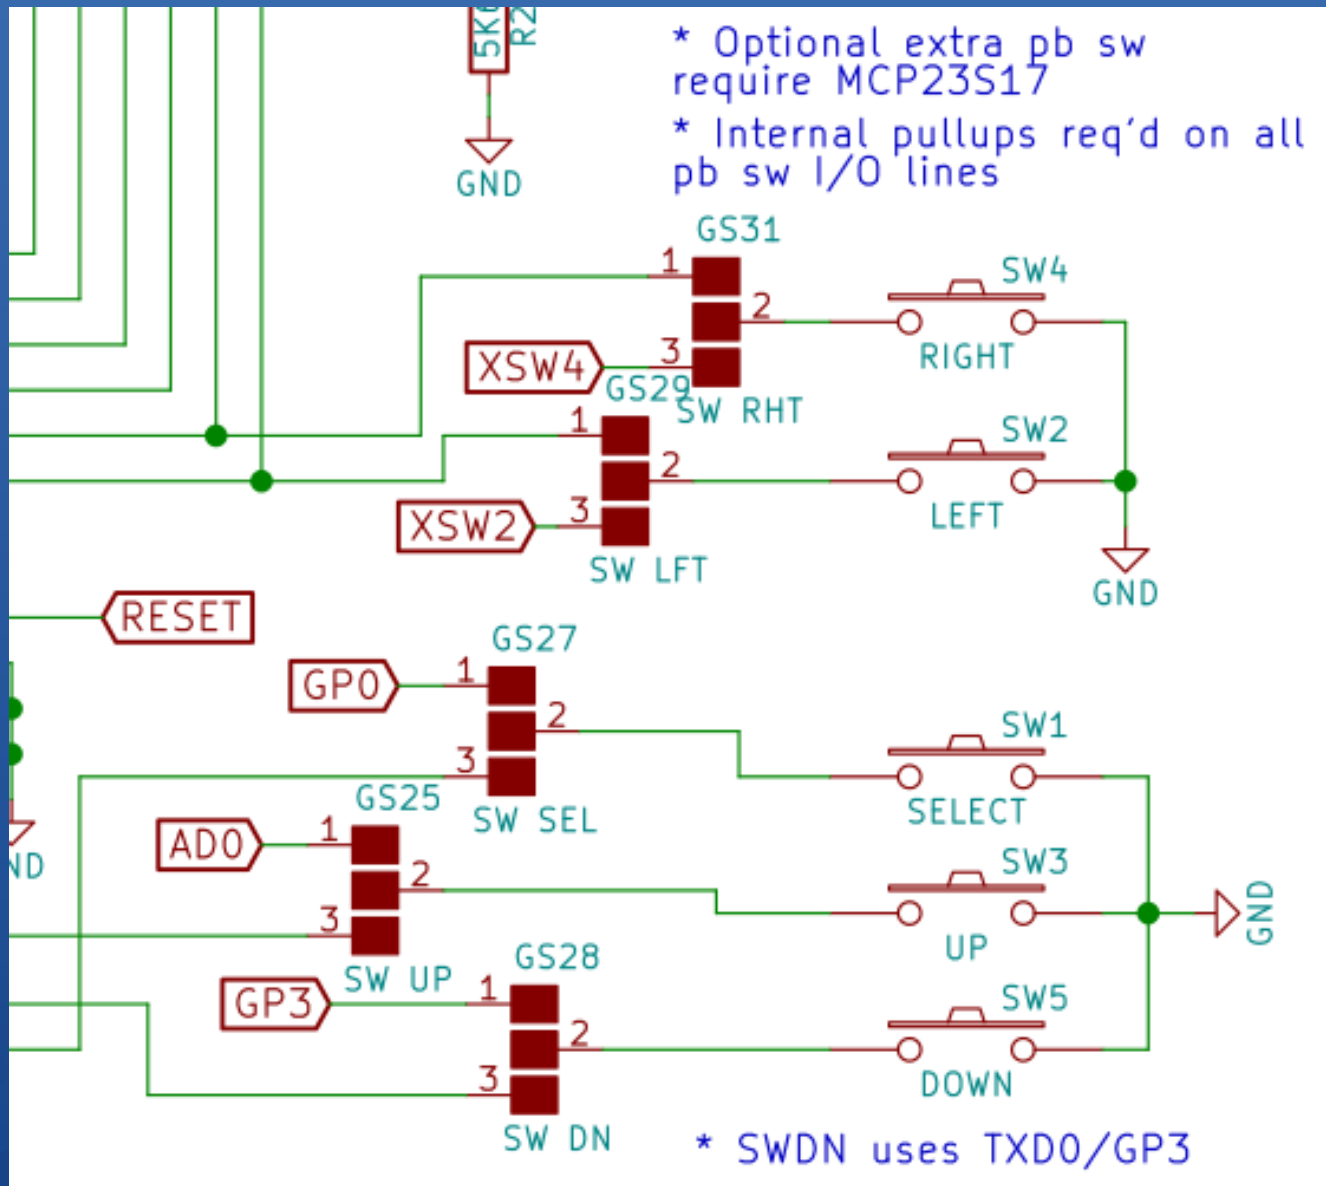

**\* Default for ALL config jumpers is pins 1-2 shorted**

# Battery Volts

# Buttons

# GPIO

A/D

# Software

- Native C/C++ on ESP8266 SDK
- LUA on NodeMCU
- Arduino IDE extensions
  - GREAT for beginners
  - Had to modify some libraries
- Silvio is the retro-king with his badge f/w!

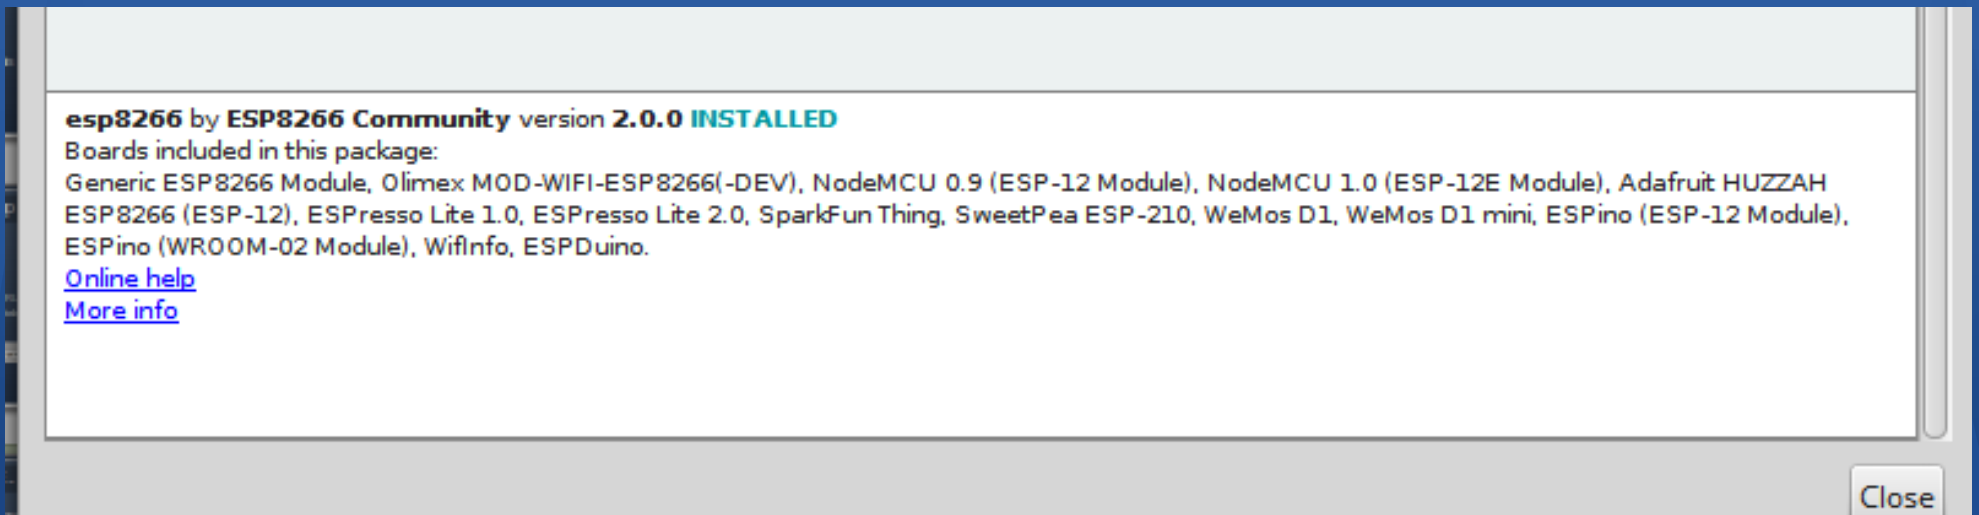

# IDE Setup

- Install Arduino 1.6.5
  - [www.arduino.cc](http://www.arduino.cc)
- Preferences
  - Additional Boards Manager URLs
  - [http://arduino.esp8266.com/stable/package\\_esp8266com\\_index.json](http://arduino.esp8266.com/stable/package_esp8266com_index.json)

# More IDE..

- Tools – Board – Boards Manager
  - ESP8266 tools
  - Install the tools...

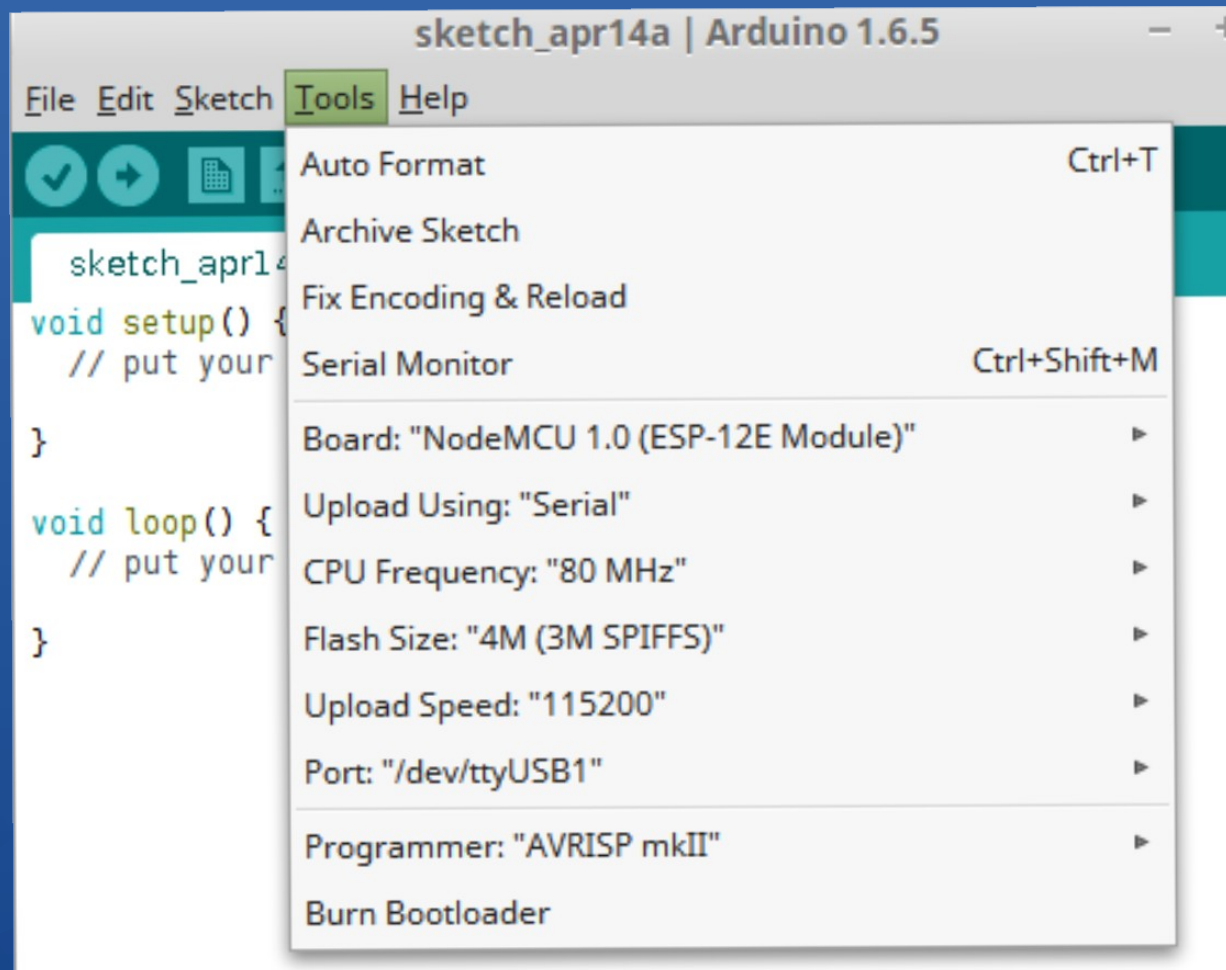

# Drivers

- NodeMCU USB/serial is CH340
- Linux no driver install
- Windows “may” need CH340 downloaded
- OSX
  - <https://tzapu.com/making-ch340-ch341-serial-adapters-work-under-el-capitan-os-x/>

# Programming

- Select NodeMCU 1.0

# Oops..
